Complete Personalization

A Unified Managed Account Customized for Every Client

Navigator® Personalized UMA (PUMA®) allows your clients to invest in multiple asset classes and sectors in a single, customized account.

Customized Asset & Strategy Allocation

Each portfolio can be completely customized, helping ensure your client's portfolio is comprehensively focused on their long-term goals and objectives. Individual stocks and bonds are used whenever possible to help keep costs low.

Tax-Loss Harvesting

On an ongoing basis, our investment team performs proactive tax-loss harvesting in an effort to lower the impact of taxes over time.

During the last quarter of each year, we perform a final check to identify any additional unrealized losses. Clients may also request additional gains or losses be realized throughout the year.

Dedicated Support Team

Access regional Investment Consultant support along with Clark Capital's Client Portfolio Management (CPM) Team of CFA®-level professionals. Our CPM Team provides detailed institutional analysis of prospective client portfolios and is available for quarterly client calls and reviews for accounts over \$1 million.

Simplified Reporting

Hold multiple strategies in a single account with just one quarterly household statement, making it easier to review your client's progress and performance.

Tax Transitions

When transitioning an account to Clark Capital, our Client Portfolio Management Team is available to help create a custom tax transition plan that will allocate gains in a client's existing portfolio over two to three tax years.

Options Enhancement Program

For clients with large blocks of stock that cannot be unwound in the normal two to three-year time frame, an option enhancement strategy can be used in a stand-alone account or wrapped into a PUMA®.

Automatic Rebalancing

Every account is checked daily for large deviations that may result from market movements in different asset classes and accounts are rebalanced as necessary, so your clients can remain confident in their long-term goals and objectives. All PUMA® accounts are rebalanced annually to bring the account back to the allocations originally outlined in your client's proposal.

Account Screens and Restrictions

Clients may customize their accounts to apply screens and restrictions to exclude an individual security or groups of securities. Just give us a list of tickers or industry groups you'd like to exclude.

Investors must make their own decisions based on their specific investment objectives and financial circumstances.

Clark Capital Management Group, Inc. ("Clark Capital") reserves the right to modify its current investment strategies, features, or services at any time.

Tax loss harvesting is a strategy of selling securities at a loss to offset a capital gains tax liability. It is typically used to limit the recognition of short-term capital gains, which are normally taxed at higher federal income tax rates than long-term capital gains, though it is also used for long-term capital gains. The benefits of tax loss harvesting, if any, in reducing an investor's tax liability will depend on the investor's entire tax and investment circumstances, including but not limited to: income, state of residence, the purchases and dispositions of assets in household accounts outside of Clark Capital, type of investment, and investment holding period. Investors should confer with their personal tax advisor regarding specific tax questions and obligations.

Clark Capital Management Group, Inc. is an investment adviser registered with the U.S. Securities and Exchange Commission. Registration does not imply a certain level of skill or training. More information about Clark Capital's advisory services and fees can be found in its Form ADV which is available upon request.
