About Clark Capital

For over 30 years, Clark Capital has provided traditional and innovative investment strategies to help investors achieve their unique goals and objectives. Our investment philosophy is driven by a single focus — adding value for our investors.

We utilize a wide range of asset classes and strategies to build portfolios with purpose, and we strive to construct portfolios that stand up to short-term volatility, so you can stay committed to your long-term goals.

Our disciplined investment philosophy is grounded in three core principles:

Meaningful Diversification

Multiple asset classes and methodologies are incorporated to help align the client's risk comfort zone with their goals.

Opportunistic Asset Allocation

We believe a rapidly changing investment landscape demands a flexible approach that can adapt to market conditions.

Risk Management

Our approach to risk management is founded in active management, which allows us to proactively adjust asset allocations so you can remain committed to reaching your long-term goals—regardless of the ups and downs of the markets.

Are Your Emotions at Odds with Your Goals?

"Be fearful when others are greedy, be greedy when others are fearful."
-Warren Buffett

Average Investor vs the Market

The market earned 5.62% while the average equity investor only earned 3.88% during a 20 year period.

As of 12/31/2018, Source: Dalbar, Inc.

Greed and fear are the emotions that may keep investors from meeting their goals.

Investors are most likely to invest at market peaks and "cash out" at low points, locking in losses. With the help of William Braun, your financial advisor, and Clark Capital as your asset manager, you may be less likely to experience the pitfalls of unguided investors and more likely to stay committed to achieving your financial goals.

These visuals are shown for illustrative purposes only and do not guarantee success or a certain level of performance.

Investment Process: Relative Strength

What Is Relative Strength?

Relative Strength is a momentum-based, quantitative approach to investing, which compares the price action of a single security or asset class against all other investment vehicles in its category.

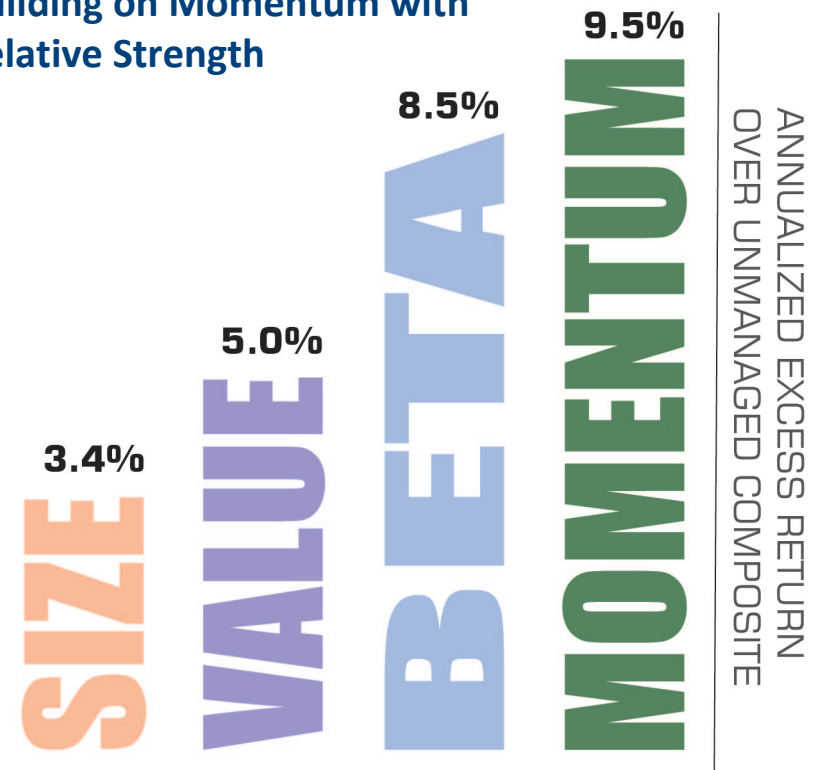

Over time, it identifies outperforming and underperforming trends and seeks to exploit those trends. It is grounded in over 80 years of academic research.

Why Relative Strength?

- It has been shown to produce better risk-adjusted returns over time compared to an unmanaged portfolio.
- It is quantitative, employing historical data that is not affected by emotion or personal bias and does not rely on forecasting.
- It allows price movements of global markets to determine trends, providing definable entry and exit points for trades.
- It is disciplined and objective and can adapt to new market themes as they emerge.
- When combined with a fundamental approach, relative strength may improve diversification.

*Why Momentum Investing Works. A Wealth of Common Sense, July 7, 2015 (Retrieve from <http://awealthofcommonsense.com/why-momentum-investing-works/>) Kenneth French Data Library. Available at http://mba.tuck.dartmouth.edu/pages/faculty/ken.french/Data_Library/det_mom_factor.html

Building on Momentum with Relative Strength

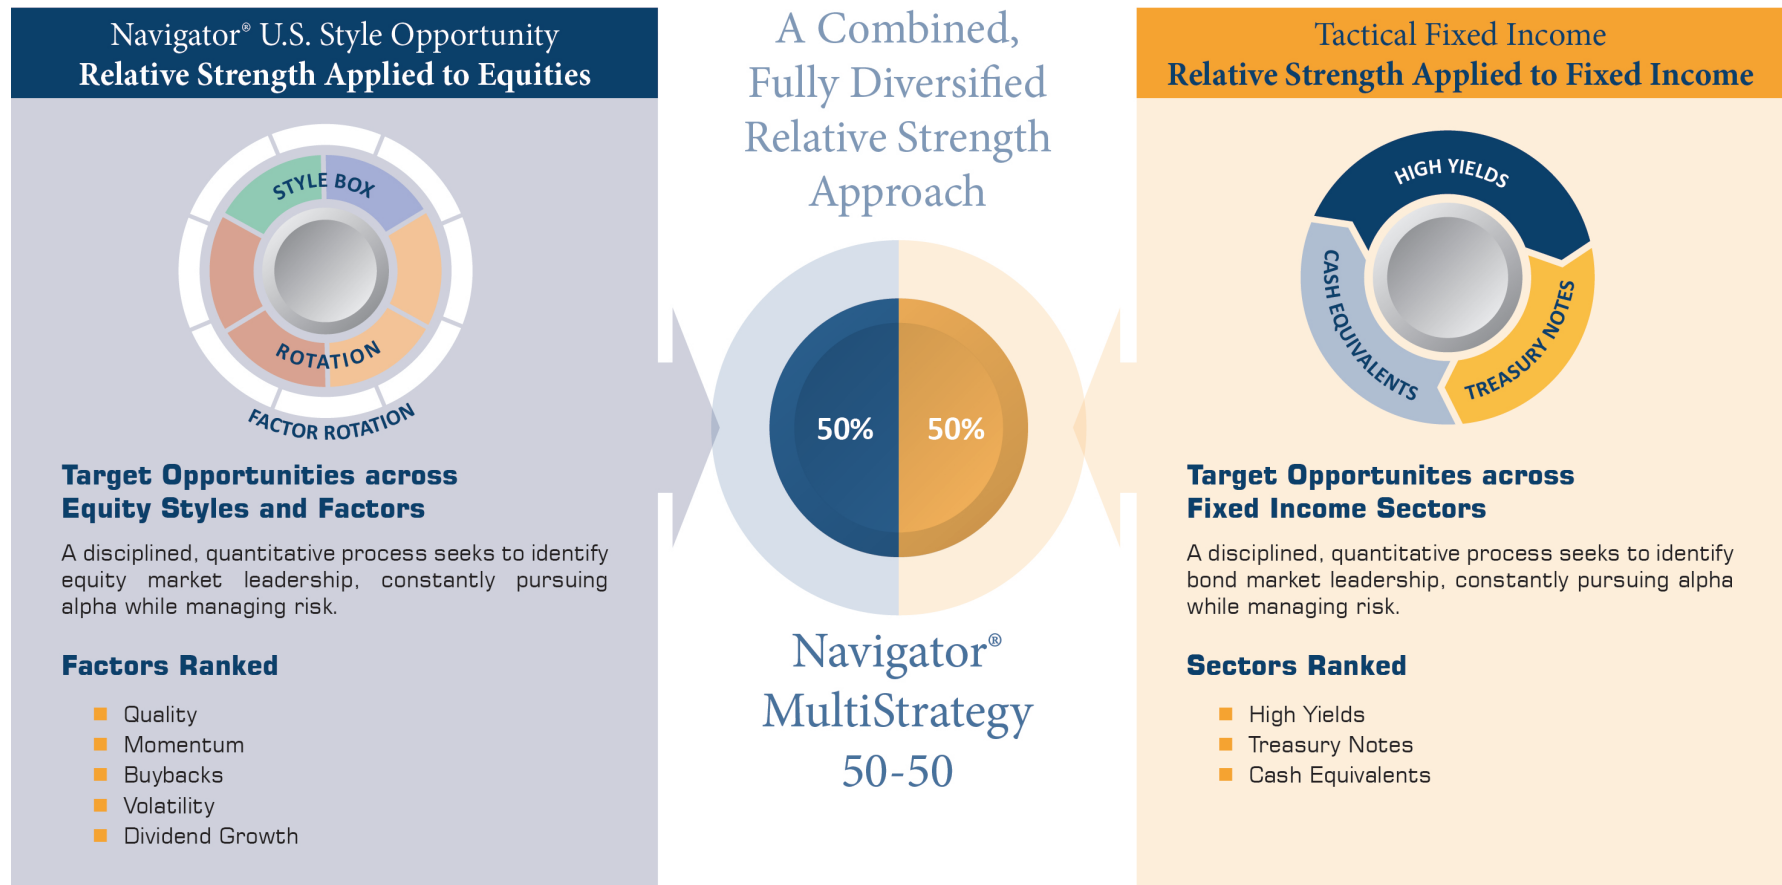

The four investment factors above generated annualized excess returns over an unmanaged composite from 1927 through 2014.

Strategy Overview: Navigator MultiStrategy 50-50

Navigator MultiStrategy combines actively managed equity and fixed income in one portfolio suited to the investor's goals and objectives. It utilizes a quantitative, disciplined relative strength process that actively pursues opportunities while guarding against undue risk.

The strategy opportunistically shifts among U.S. style and market capitalization, U.S. factors, and fixed income sectors utilizing 50% Navigator U.S. Style Opportunity strategy and 50% Tactical Fixed Income.

Results represent actual portfolio performance of the Navigator MultiStrategy 50-50 composite. Performance shown in this proposal is past performance, which is not indicative of future results. Performance, risk measures and other data presented herein are gross (before the deduction) of investment advisory fees and include the reinvestment of all income. Returns will be reduced by investment advisory fees and other account expenses. As illustrated in the Important Disclosures section at the end of this proposal, the inclusion of such fees would reduce performance, particularly when compounded over a period of years. Please see the Important Disclosures section at the end of this proposal for additional information.

Current Yield (Gross) = 1.19%

Asset Classes

■ Domestic Equity	50.00%
■ Fixed Income	48.00%
■ Cash	2.00%

Percentages may not total 100 due to rounding.

The Benchmark for Sample Account is 50% Russell 3000 & 50% BBgBarc US Corporate High Yield. For a description of the benchmark, see the disclosure at the end.

A Collaborative Partnership

A Shared Commitment to Ensuring You Achieve Your Desired Outcomes

Sample Advisor
ABC Investments

Sample Client

As an investor, you can obtain the best level of service by providing thorough and current information to your financial advisor about your financial status, investment goals and risk tolerance.

- Provide your advisor with all relevant information about your finances
- Define your financial goals, objectives, and risk comfort level
- Communicate any investment constraints or changes to your goals or circumstances

As your investment manager, our goal is to ensure that you achieve your goals. We support your financial advisor by prudently watching over your assets and making adjustments as warranted by the markets.

- Invest your assets in an investment strategy reflective of the investment objectives identified by you and your advisor
- Manage, evaluate, and monitor your investment strategies
- Deliver ongoing account support through a dedicated team of regional and home office professionals

Sample Advisor of **ABC Investments** will help you develop a comprehensive financial plan by providing research, advice, and guidance regarding planning and portfolio management. They will provide you with a process for building, managing and protecting your assets.

- Analyze and evaluate your financial status to recommend and implement your wealth management strategy
- Meet with you periodically to review the suitability of your investments and performance relative to your goals and objectives
- Educate and guide you if changes to the investment strategy need to be made as a result of changes to your financial circumstances

Important Disclosures

THIS DISCLOSURE CONTAINS IMPORTANT INFORMATION AND SHOULD BE REVIEWED CAREFULLY WHEN CONSIDERING AN INVESTMENT IN THIS STRATEGY.

This information is provided by Clark Capital Management Group ("Clark Capital") to recipients who are professional financial advisors for their use in a one-on-one presentation with the client identified herein. This information is for one-on-one use only and should not be distributed to any other parties. This document is neither an offer to sell nor a solicitation to buy any security or investment product. It is Clark Capital's preliminary recommendation based on information provided by the financial advisor. It should not be assumed that any of the recommendations discussed will prove to be profitable, or that the investment recommendations or decisions made in the future will be profitable. This analysis could change significantly as more information about the objectives, time horizon and risk tolerance of the financial advisor's client is learned. The actual characteristics with respect to any particular client account will vary based on a number of factors including but not limited to: (i) the size of the account; (ii) investment restrictions applicable to the account; and (iii) market exigencies at the time of investment. Clark Capital reserves the right to modify its current investment strategies and techniques based on changing market dynamics and/or the client's needs.

The opinions expressed herein are those of the Clark Capital Investment Team. The opinions referenced are as of the date of publication and are subject to change due to changes in the market or economic conditions and may not necessarily come to pass. There is no guarantee of the future performance of any Clark Capital investment portfolio. Material presented has been derived from sources considered to be reliable, but the accuracy and completeness cannot be guaranteed. This material is not intended to be relied upon as a forecast or research. The investment or strategy discussed may not be suitable for all investors. Investors must make their own decisions based on their specific investment objectives and financial circumstances. Past performance does not guarantee future results. All investing involves risk, including a loss of principal.

There is no assurance that any securities, sectors or industries discussed herein will be included in or excluded from an account's portfolio at the time you receive this report or that securities sold have not been repurchased. It should not be assumed that any of the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.

Clark Capital is an investment adviser registered with the U.S. Securities and Exchange Commission. Registration does not imply a certain level of skill or training. More information about Clark Capital's advisory services can be found in its Form ADV, which is available upon request. Clark Capital is not affiliated with any brokerage firm, financial advisor or any other third party entity mentioned in this material.

This document may contain certain information that constitutes "forward-looking statements" which can be identified by the use of forward-looking terminology such as "may," "expect," "will," "hope," "forecast," "intend," "target," "believe," and/or comparable terminology (or the negative thereof). No assurance, representation, or warranty is made by any person that any of Clark Capital's assumptions, expectations, objectives, and/or goals will be achieved. Nothing contained in this document may be relied upon as a guarantee, promise, assurance, or representation as to the future.

PERFORMANCE INFORMATION

Gross Performance

The performance information presented herein does not reflect the deduction of fees and expenses, including fees payable to Clark Capital, the program or platform sponsor, your financial advisor, and other expenses that an investor may incur. When these fees are deducted quarterly, the fees will have a compounding effect on performance that can be material. For example, on an account with an initial value of \$100,000 and a 2% annual fee, if the gross performance is 10% per year over a three-year period, the compounding effect

Important Disclosures

of the fees will result in a net compound rate of return of approximately 7.81% per year over a three-year period, and the total value of the client's portfolio at the end of the three-year period would be approximately \$133,100 without the fee and \$125,307 with the fee. For a schedule of all fee and expenses associated with the services that will be provided for the proposal account, please contact your financial advisor and/or the program sponsor. More information about Clark Capital's advisory services and its management fee can be found in its Form ADV which is available upon request.

Model Performance

This presentation contains performance results that are designated as "model performance." Model performance results represent a blend of actual historical performance of two or more Clark Capital strategies. Model performance is hypothetical in nature and is provided for informational and illustrative purposes to indicate historical performance had the model portfolio been available over a relevant period. Model performance results have certain inherent limitations and are prepared with the benefit of hindsight. No representation is being made that any model or model mix will achieve results similar to that shown and there is no assurance that a model that produces attractive results on a historical basis will work effectively on a prospective basis. Model performance is not indicative of future results. Additionally, any model portfolio results portrayed in this presentation:

- Do not reflect the impact that material economic and market factors might have had on Clark's actual decision making;
- Include the reinvestment of income;
- Do not reflect taxes; and
- May have materially different portfolio characteristics than the index, described below, including, but not limited to, holdings, turnover, and volatility.

All model portfolios presented herein are rebalanced monthly. Inception date is earliest date common to all portfolios in each segment or for the account as a whole. Returns greater than one year are annualized. Clients should not rely solely on the performance presented herein or any other performance illustrations when making investment decisions. Actual performance may differ from model results.

Client account values will fluctuate and may be worth more or less than the amount invested. Clients should not rely solely on any performance presented herein or any other performance illustrations when making investment decisions. The actual returns experienced by individual clients will differ due to many factors including, but not limited to, their individual investments and fees, individual client restrictions, and the timing of investments and cash flows. It should not be assumed that any of the investment decisions made in the future will be profitable.

BENCHMARK DESCRIPTIONS

Navigator MultiStrategy 50-50: The MultiStrategy 50-50 benchmark consists of a 50% allocation to the Russell 3000 and a 50% allocation to the BBgBarc US Corporate High Yield. The Russell 3000 Index measures the performance of the 3000 largest U.S. companies based on total market capitalization, which represents approximately 98% of the investable U.S. equity market. The BBgBarc U.S. Corporate High-Yield Index covers the U.S. dollar-denominated, non-investment grade, fixed-rate, taxable corporate bond market. Securities are classified as high-yield if the middle rating of Moody's, Fitch, and S&P is Ba1/BB+/BB+ or below. The benchmark for this composite is based upon the approximate allocation of equities and fixed income in the MultiStrategy composite. The Russell 3000 is generally representative of broad based equities. The BBgBarc US Corporate High Yield is generally representative of broad based U.S. fixed income. Index returns are rebalanced monthly and reflect the reinvestment of income and other earnings.

ADDITIONAL DISCLOSURES

Tax Loss Harvesting

Important Disclosures

Tax loss harvesting is a strategy of selling securities at a loss to offset a capital gains tax liability. It is typically used to limit the recognition of short-term capital gains, which are normally taxed at higher federal income tax rates than long-term capital gains, though it is also used for long-term capital gains. The utilization of losses harvested through tax loss harvesting will depend upon the recognition of capital gains in the same or a future tax period, and in addition may be subject to limitations under applicable tax laws. Losses harvested through the strategy that are not utilized in the tax period when recognized (e.g., because of insufficient capital gains and/or significant capital loss carry forwards), generally may be carried forward to offset future capital gains, if any.

The benefits of tax loss harvesting, if any, in reducing an investor's tax liability will depend on the investor's entire tax and investment circumstances, including but not limited to: income, state of residence, the purchases and dispositions of assets in the investor's (and their spouse's) accounts outside of Clark Capital, type of investment accounts held, and applicable investment holding period.

Investors should confer with their personal tax advisor regarding the tax consequences of investing with Clark Capital. Investors and their personal tax advisors are responsible for how transactions conducted in an account are reported to the IRS, or any other taxing authority, on their personal tax return. Clark Capital assumes no responsibility for the tax consequences to any client.

GLOSSARY OF TERMS

Standard Deviation: A statistical measure of dispersion about an average which depicts how widely the returns varied over a certain period of time.

Beta: A measure of systematic risk with respect to a benchmark. Systematic risk is the tendency of the value of the composite and the value of the benchmark to move together. Beta measures the sensitivity of the composite's excess return (total return minus the risk-free return) with respect to the benchmark's excess return that results from their systematic co-movement. It is the ratio of what the excess return of the composite would be to the excess return of the benchmark if there were no composite-specific sources of return. If beta is greater than one, movements in value of the composite that are associated with movements in the value of the benchmark tend to be amplified. If beta is one, they tend to be the same, and if beta is less than one, they tend to be dampened. If such movements tend to be in opposite directions, beta is negative. Beta is measured as the slope of the regression of the excess return on the composite as the dependent variable and the excess return on the benchmark as the independent variable.

The beta of the market is 1.00 by definition. Morningstar calculates beta by comparing a portfolio's excess return over T-bills to the benchmark's excess return over T-bills, so a beta of 1.10 shows that the portfolio has performed 10% better than its benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Conversely, a beta of 0.85 indicates that the portfolio's excess return is expected to perform 15% worse than the benchmark's excess return during up markets and 15% better during down markets.

Current Yield: A Measure of an investment's annual income (interest or dividends) divided by the current price of the security. This measure looks at the current price instead of its face value.
