Our Investment Approach

Our mission is to provide advisors with investment strategies that can help clients stay on track to reach their long term goals. We do this by creating investment strategies designed to help clients remain committed to their individual financial plans.

EXPERIENCE

Our Portfolio Managers have an average of 28 years of industry experience, helping you expand the expertise you provide your clients.

DISCIPLINE

Using a combination of fundamental and quantitative research, our investment approach is unemotional and repeatable.

PARTNERSHIP

We provide a truly collaborative approach to portfolio construction, taking the time to listen, learn, and help investors achieve their goals.

Investment Philosophy

We believe that investors are best served through a diverse selection of asset classes and investment approaches that closely align with their investment goals.

Our investment philosophy is grounded in three core principles: meaningful diversification, opportunistic asset allocation, and risk management:

Meaningful Diversification

We incorporate multiple global asset classes and methodologies into a portfolio that is aligned to the client's life goals.

Opportunistic Asset Allocation

We utilize an active approach to asset allocation that allows us to take advantage of growth opportunities in a rapidly changing global marketplace.

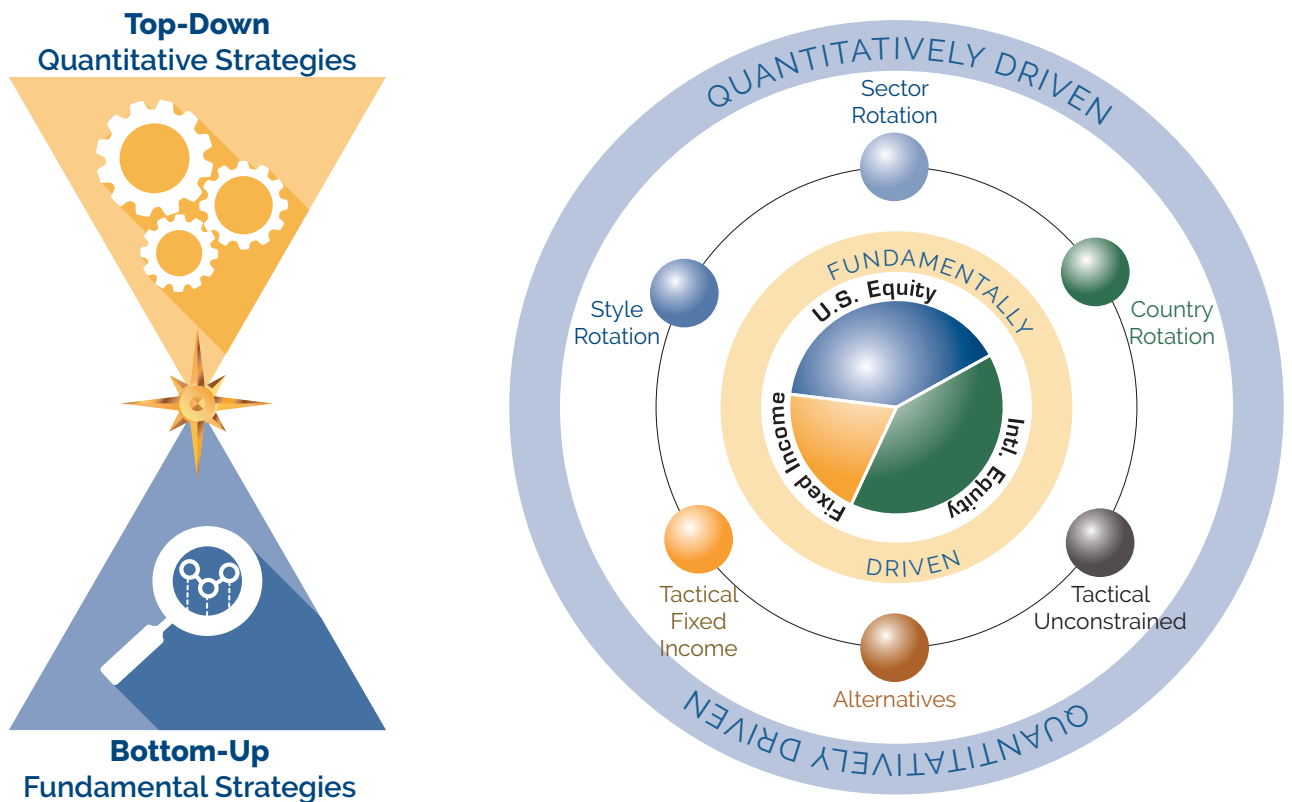

Risk Management

We believe that personalized risk management can help clients remain committed to reaching their long-term goals, regardless of the ups and downs of the markets.

Investment Process

Our goal is to provide meaningful diversification through a bottom-up, fundamental investment process combined with a top-down, quantitative approach.

In our fundamental, bottom-up strategies, portfolio managers utilize an active approach to individual security selection. Each stock and bond is carefully analyzed by our team of investment professionals and handpicked for each portfolio.

In our quantitative, top-down strategies, portfolio managers utilize a disciplined, relative strength approach. This relative strength approach drives our tactical shifts in the portfolios that seek opportunities and guard against undue risks.

Investment Team

More information about Clark Capital's advisory services can be found in its Form ADV, which is available upon request. Past performance is not indicative of future results. The awards shown are not indicative of the adviser's future performance and may not be representative of any one client's experience because the rating reflects an average of all, or a sample of all, the experiences of the adviser's clients.

The PSN universes were created using the information collected through the PSN investment manager questionnaire and use only gross of fee returns. Mutual fund and commingled fund products are not included in the universe. PSN Top Guns investment managers must claim that they are GIPS compliant. Products must have an R-Squared of 0.80 or greater relative to the style benchmark for the ten year period ending December 31, 2017. Moreover, products must have returns greater than the style benchmark for the ten year period ending December 31, 2017 and also Standard Deviation less than the style benchmark for the ten year period ending December 31, 2017. At this point, the top ten performers for the latest 10 year period ending December 31, 2017 become the PSN Top Guns Manager of the Decade. This designation may not be representative of any one client's experience because the rating reflects an average of all, or a sample of all, the experiences of investors in the strategy. Though the strategy was in the top ten, it was not ranked first in the top ten category for each period. The relative strength measure is based on historical information and should not be considered a guaranteed prediction of market activity. It is one of many indicators that may be used to analyze market data for investing purposes. The relative strength measure has certain limitations such as the calculation results being impacted by an extreme change in security price.
