

Navigator® MultiStrategy

Tactically Navigate the Markets with an Active Approach

The U.S. equity and fixed income markets offer a variety of growth opportunities, but they also present a number of unique challenges and risks. We believe investors may benefit from a disciplined, quantitatively managed asset allocation that actively pursues opportunities while guarding against undue risk.

Participate in U.S. Equity Trends

Allocate to areas of the U.S. equity markets that are outperforming their peers on a relative basis.

The strategy is grounded in a quantitatively based relative strength research process. It seeks to identify and participate in the leading U.S. equity styles (growth & value), factors (such as momentum, volatility, and quality), and market capitalizations (large, medium and small).

Utilize a Flexible Bond Approach

Pursue opportunities in the high yield sector while having the ability to allocate to safer fixed income sectors.

The strategy uses an asset allocation policy that seeks to rotate among:

- High yield
- U.S. Treasuries
- Cash equivalents

Maintain the Investor's Appropriate Risk Allocation

Multiple Asset Allocations Portfolios to meet the goals and objectives of the Individual Investor.

The strategy is available in three equity/fixed income allocations: 75/25, 50/50, 25/75. While the underlying equity and fixed income holdings are actively managed, the overall asset allocation will be rebalanced as needed to maintain the proper risk profile.

Navigator® U.S. Style Opportunity Relative Strength Applied to Equities **ACTOR ROTATION* Target Opportunities across Equity Styles and Factors A disciplined, quantitative process seeks to identify equity market leadership, constantly pursuing alpha while managing risk.

Tactical Fixed Income Relative Strength Applied to Fixed Income

Target Opportunites across Fixed Income Sectors

A disciplined, quantitative process seeks to identify bond market leadership, constantly pursuing alpha while managing risk.

Available in 3 Equity/Fixed Income Allocations

Building on Momentum with Relative Strength

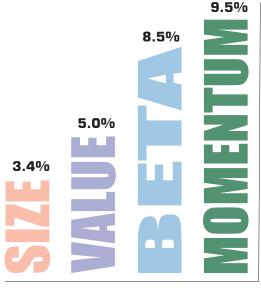

Navigator® MultiStrategy utilizes Clark Capital's quantitative, relative strength-based research process across both equity and fixed income in pursuit of alpha over a full market cycle.

What Is Relative Strength?

Relative strength is a momentum-based, quantitative approach to investing grounded in over 80 years of academic research. It compares the price action of a single security or asset class against all other investment vehicles in its category. Over time, it seeks to identify and exploit outperforming and underperforming trends.

Why Use Relative Strength?

- May produce better risk-adjusted returns over time compared to an unmanaged portfolio.
- Employs historical data that is not affected by emotion or personal bias and does not rely on forecasting.
- Allows price movements of global markets to determine trends, providing definable entry and exit points for trades.
- Utilizes a disciplined and objective approach that can adapt to new market themes as they emerge.
- May improve diversification when combined with a fundamental approach.

OVER UNMANAGED COMPOSITE

The four investment factors above generated annualized excess returns over an unmanaged composite from 1927 through 2014.

Relative strength is a momentum-based strategy. Nobel prize winning economist Eugene Fama and Dartmouth professor Kenneth French analyzed investment returns from 1927 through 2014. Of the four factors they studied, momentum delivered consistent outperformance versus the unmanaged composite of stocks in the NYSE, AMEX, and NASDAQ.
